CONCORD by Stouby

CONCORD

Design: Thomas Pedersen - Year: 2010 / 2011

Concord – harmonic elegance and lighting lightness are characterizing for the chair. Concord gets inspiration from the legendary passenger plane. With self-confidence this chair will create absolute attention in both private residences and hotel lobbies all over the world. Concord is characterized with a special frame structure, which supports the expression of the seat and gives the feeling that the chair more or less is drifting. The casted aluminum legs follow the chairs shape and gives the design a sharp and streamlined look. Concord is available in both fabric and leather and is based on a form casted foam in the back and the seat. This ensures a good sitting comfort and also ensures that the chair keeps its shape many years ahead. In the range you will also find the Cumulus and Cirrus tables. Available as low chair, high chair, low chair with headrest and footstool.

CIRRUS & CUMULUS

Design: Thomas Pedersen - Year: 2010

With inspiration from the Concord chair, the Cirrus & Cumulus chairs also have the organic form language, which can be seen from the tabletop and the whole way down to the aluminum casted legs. The top is constructed of high-pressured laminate with a black core and the common denomination for the Concord serie is the high polished aluminum legs, which supports the expression of the Concord. The legs are following the tabletops shape and bring the design a sharp and streamlined look. The tables are available in two different sizes, both in black and white as standard, but can also be delivered in a large range of different colors as well as two heights: 42,5/47,5 cm

FROST by Stouby

FROST

Design: FurnID - Year: 2011

Frost is designed by the Danish design duo FurnID, represented by furniture designer Bo Strange and industrial designer Morten Kjær Stovegaard, who due to the Frost chair can call themselves award winners. The outside of Frost is made of casted foam and the inside of soft foam, which overall is covered with textile or leather. This construction ensures a good sitting comfort and also ensures that the chair keeps its shape many years ahead. The legs are natural oak, soap treated, lacquered or dark stained. This combination gives the chair at one time a classic look and a futuristic look. With its sculptural details and finished elegance Frost is perfect with design classics and modern furniture, and for that reason this sophisticated chair will be a beautiful element in private homes and commercial areas, like hotel lobbies and airports.

**Restaurant & Bar

Winner of the Armchairs category 2015/2016

BILOBA by Stouby

BILOBA

Design: Acer Design - Year: 2013

The lounge chair Biloba is inspired by the leaves from the Temple Tree, Ginkgo Biloba leading to an ideology about strength and unity. It is created from natural Scandinavian materials with a purity of design. The chair gives an expression of community spirit, which is often experienced in Asiatic cultures as well as a predilection for the good craftsmanship. The hole in the back is an architectural detail, which reveals the form of the leaves. The two leaves create an opportunity to choose different materials and colors to the connecting shapes, this combination leads one's thoughts to harmony and the unity of Ying and Yang. Biloba can be delivered with returnfunction in Oak (natural and black stained), Walnut and Makassar. The legs are highly polished aluminum. The seat and back cushions can be delivered in fabric or leather.

MIRAGE by Stouby

MIRAGE

Design: Thomas Pedersen - Year: 2012

Mirage is the result of a design cooperation based on shared values of ergonomic comfort, timeless design and sublime craftsmanship. Mirage is characterized by round organic shapes in a tight and resilient design. The cigar-shaped legs placed under the seat frame, raises the sofa with a light and airy expression. The combination between the low and deep seat height contributes to a comfortable lounge feeling. Mirage is a modular sofa and available in four different modules that can be combined as desired and in a myriad of options. Available in fabric and leather which can be combined for a unique look.

INTERDANE by Stouby

INTERDANE

Design: Oluf Lund - Year: 1989

Interdane – a flexible armchair, which offers great comfort and a refined visual identity. Interdane is produced in stainless steel which allows for precision detailing. The light construction creates a slight rocking feeling when one sits in the chair. The neck rest has been created out of cold foam and the stitching on the seat cushion gives the chair a graphical outline. Interdane has an in-built footstool, which is easy to unfold and easy to fold, giving extra back support. It is flexible, ergonomic and very comfortable. Available in fabric and leather, with or without armrest.

AYO

Design: Susanne Grønlund - Year: 2014

AYO with its curvy smoothness and soft padded construction are created for absolute relaxation, which are contrasted elegantly by a functional design, contrasting seams and light wooden legs. Voluminous softness is cleverly combined with Scandinavian lightness in a smooth feminine design expression. AYO is inspired by the smooth shapes of stones from the beach, which are rounded by the waves and sea. Available as a couch and low chair.

CREATE YOUR OWN SOFA...

RAM by Stouby

RAM

Design: Anders Nørgaard - Year: 1998

Ram chair and footstool are available in fabric or leather, with or without neck rest, "the horn of the ram". The seating upholstery is cold foam with pocket springs and the legs in brushed stainless steel. Ram has a strong personality and a unique charisma

GEMINI

Design: Verner Østergaard - Year: 2004

Gemini is a series of sofas made with upholstered seat and back. The seat, backrest and armrests are made in one piece of fabric, to obtain smooth and round angles. The wide armrests seem to be wrapped around the seat, and the seams have been minimized. Gemini is available with slim aluminium legs, with square legs in brushed steel, with round legs in beech and now also with steel bars. Available as sofa and chair.

MOJO PLATFORM

Design: Hans Thyge - Year: 2003

Mojo Platform is a high lustre table series. The combination of slim aluminium legs and unique tabletop with step-like sides raise the centre of gravity visually. It is available in oval or sunglass shaped design, both in black or white, or with free choice of Ral or Pantone colors at extra charge.

With more than 100 years of producing furniture for customers, all over the world, we wish to enrich the world with innovative design. Our designs are created in conjunction with the front-runners from a new generation of designers together with international knowns. Our furniture has a long lasting design, an excellent comfort and are all handcrafted in our own manufactory in Denmark and will last for centuries. Each piece of furniture is made to order by our experienced craftsmen. We supply the standard designs, but have also the capability to supply different shapes, dimensions and special fabrics and leathers.

That's what we call "Design it your way".

Furniture from Stouby will bring you joy for many, many years!
